

Arifal Hidayat Salamulloh

Backend Developer

I am a backend developer, having more than one year experience working as a backend developer, having expertise in programming languages HTML CSS Bootstrap PHP with Laravel framework, Ruby with Ruby On Rails, experience using MongoDB, MySQL, PostgreSQL, and Redis databases. I use linux version 18.04 for work in windows 11 with wsl2, can work with a team using git in github or bitbucket. now I'm working with ruby on rails, fixing bugs and creating new features such as transaction calculation, summary of transactions, and creating new products for pawn within the existing system.
